

8th Kazakhstan International Exhibition

Road & Heavy Construction Machinery, Municipal Machinery

21-23 September 2011

ALMATY, KAZAKHSTAN

KAZCOMAK

www.kazcomak.kz

The Kazakhstan International Exhibition Kazcomak 2011 is the main specialized exhibition in the Central Asia Region to attract international and major local companies engaged in the development of quarries and related operations, production of asphalt, handling machinery and equipment, the construction of industrial projects, road building and housing and public utilities construction, and road patching and renovation.

Exhibition sectors

Asphalt plants
Motors and generators
Road construction , earth moving machines
Quarry equipment
Municipal machinery
Construction machinery
Tunnelling machines
Hoisting equipment, cranes
Boring, boring, excavating equipment and tools
Excavators, loaders, graders, bulldozers, tractors, mini excavators
Track equipment
Spare parts and components for machinery and equipment

Tyres
Compressors, hydraulic and pneumatic equipment
Conveyors, manipulators
Renting and leasing of machinery and equipment
Design and construction of roads, bridges and tunnels
Machinery and materials for road maintenance and rehabilitation
Design, construction and repair work
Industrial technologies
Measuring equipment, surveying instruments
Technical means of traffic management: traffic signs, traffic lights, road markings and barriers

The exhibition provides a unique opportunity to meet professionals from around the world and learn more about business opportunities in Central Asia. Traditionally Kazcomak holds alongside the largest exhibition in Central Asia - Mining and Processing of Metals and Minerals "MiningWorld Central Asia", a traditional meeting place and unifying platform for representatives of mining and metallurgical communities of Kazakhstan and specialists from more than 26 countries

According to the Ministry of Transport and Communications of Kazakhstan in 2010-2012 for the construction of the transit corridor "West China – West Europe" is planned to construct 2,452 km of roads, of which 1,390 km will be four-and six-lane highway. To create the Kazakh section of the transcontinental corridor will require 17.3 million cubic meters of rubble, 3 million tons of cement, 540 tons of asphalt, about 500 thousand cubic meters of concrete products, more than 16 thousand road signs. In construction work will involve more than 9 thousand units of road-building machinery. In 2010-2012, the construction of public roads is planned to allocate 9.3 billion dollars.

Kazcomak 2010 - Key facts and figures

Total exhibition area: **3297** sq.m
Exhibitors: **72** companies
Professional Visitors: **3286**

Countries represented

Austria	Poland
Belorussia	Russia
China	South Korea
Germany	Spain
Italy	Turkey
Japan	USA
Kazakhstan	UAE
Lithuania	Ukraine

68% of exhibitors launched new products
93% of exhibitors have found useful and perspective contacts at the exhibition
14% of participating companies signed contracts during the exhibition
81% of visitors annually visit Kazcomak
94% of visitors said they were led to an exhibition of interest for business development/production
54% of visitors have found exactly what they were looking for; 40% have found a more interesting alternative to what was sought
